

# Project Sheet

## Aerospace Industrial Park Vesta

### CLIENT

Vesta

### LOCATION

Querataro, Mexico

### ROLE

Project and Construction  
Management

### COST/SIZE

\$ 50 Million  
200 Acre Park

ECM was selected to serve as the project manager for the development and construction of the infrastructure for the 200 acre Querataro high-tech aircraft manufacturing industrial park to house multiple global aerospace suppliers.

The development and management of the industrial park's infrastructure, included earthwork, site drainage, potable water, sewer, gas, electrical fire protection systems, alarm systems, and the construction of roadways, streets, public lighting and substations.

ECM's construction management services included master schedule development, construction bid and selection support, constructability reviews, pay application review and approval, quality control management, utility relocation coordination, schedule management and progress review, and closeout with warranty management.
