

# Project Sheet

## Classroom and Laboratory Building El Paso Community College

### CLIENT

El Paso Community College

### LOCATION

El Paso, TX

### ROLE

Project Management

### COST/SIZE

\$17.5 Million  
60,500 SF

As El Paso Community College's (EPCC) fastest growing campus, the Mission Del Paso Campus was identified by EPCC's strategic plan with the need for additional classroom space for all disciplines.

The new two-story Classroom/Laboratory Building focuses on enrollment growth and innovative teaching styles. It also includes a flexitorium, a large, multi-purpose event, and an auditorium space. The flexitorium offers flexible seating arrangements and audio-visual equipment conducive to innovative teaching and special events. The building allows the college to expand the range of courses already available to students and prepare them for future growth.

ECM provided Program Management services from initial budget planning and scheduling through procurement to full-time construction management and move-in.
