

Copia Street Pond and Discharge Conduit El Paso Water

CLIENT

El Paso Water

Following major flood events in 2006, El Paso Water (EPW) began implementing a comprehensive mitigation plan resulting in studies, construction, and rehabilitation of new and existing stormwater facilities to better prepare for future flood events.

LOCATION

El Paso, TX

El Paso Water's Copia Street Pond and Discharge Conduit project is located in central El Paso. The goal of this expansion was to increase stormwater and residential runoff retention capacity flowing through the existing concrete channel.

ROLE

Construction Management

ECM was retained by EPW and provided several services including scope analysis, scheduling, constructability reviews, project management and additional office support. ECM also coordinated with utility owners and El Paso Water staff.

COST/SIZE

\$2.4 Million
