

DSP Intergrated Automotive Park Nissan-Vesta

CLIENT

Nissan-Vesta

Automotive giant Nissan, teamed with industrial real estate developer Vesta to envision an automotive manufacturing complex near Aguascalientes, Mexico.

LOCATION

Aguascalientes, Mexico

The DSP is located on a 140-acre campus that hosts multiple suppliers within the 1.6 million square foot, five building site. It is strategically designed to allow for a timely link between the automotive suppliers and production processes, streamlining and improving efficiencies in the supply chain and logistical operations for Nissan.

ROLE

Program Management

ECM was heavily involved in the \$57 million phase-one construction including: pre-construction services such as project development and creation of specifications, coordination with Nissan and supplier personnel, preparation of bid documents, contractor selection consultation and all facets of construction management.

COST/SIZE

\$57 Million
1.6 Million SF

ECM has been the “go-to” Project Manager for Vesta and has completed dozens of projects across the country.
