Construction Management

COST/SIZE

\$3 Million

FS 19: 6,418 Sf

FS 20: 880 SF

FS 21: 4,985 SF

As part of the 2021 On-Call Construction Management Program with the City of El Paso, ECM was selected to provide construction management services for their proposed renovations and upgrades to Fire Stations No. 19, 20, and 21 in the east and northeast areas of the city. These projects consisted of new construction, renovations, and additions.

ECM's construction management services provided to the City of El Paso included daily site visits by the ECM Field Representative to the three project locations to record and report the observed construction activities, safety protocol enforcement, and current project progress. The ECM representative attended weekly OAC meetings, reviewed construction documents and submittals, pay applications, change orders, took daily work progress photos, conducted monthly labor interviews, and provide the client with daily progress reports via Procore or their Share-Point site.
