

## IH-10 Americas Interchange Camino Real Regional Mobility Authority

### CLIENT

Camino Real Regional Mobility Authority

### LOCATION

El Paso, TX

### ROLE

Construction Management

### COST/SIZE

\$109 Million

The Americas Interchange project consists of the construction of three direct connectors between two major freeways, Interstate 10 and Loop 375 in El Paso, Texas. The project includes main-lane widening, realignment and expansion of I-10 frontage roads and relocation of access ramps.

As a member of the General Engineering Consultant (GEC) team for the Camino Real Regional Mobility Authority (CRRMA), ECM has provided a wide range of project management and coordination services including QA/QC support, right-of-way acquisition, utility relocation, monitoring of Federal Highway and Disadvantaged Business Enterprise compliance, and newsletter publication.

ECM understands the complexity and detail involved in the transportation sector and is currently working on multiple TxDOT projects across the State.
