

Lions Courts Renovation City of Las Cruces

CLIENT

City of Las Cruces

As Program Manager for the City of Las Cruces 2018 GO Bond Program, ECM managed the eleven park and sport courts renovations. These renovations focused on erosion control, surface court replacement, and court rehabilitation.

LOCATION

Las Cruces, NM

During ECM's scope validation, ECM noted approximately 15,000 SF of Lions Courts contained hairline cracking. The material between the original concrete slabs and top surface degraded due to age, and delamination of coatings occurred after years of reapplied seals. ECM collaborated with an expert, which resulted in the complete removal of the top surface down to the original concrete slab. A clean surface allowed repairs on all cracks, and a new top surface was applied per the United States Tennis Association recommendations.

ROLE

Project Management

ECM validated the scope of work and project budget, assisted City staff in managing public and stakeholder meetings, developed and issued Design-Build RFP, evaluated proposals, negotiated the GMP with the highest-scored design-builder,
