

Montopolis and Northwest Aquatics City of Austin

CLIENT

City of Austin

LOCATION

Austin, TX

ROLE

Program Management

COST/SIZE

Montopolis: \$4.6 Million
Northwest: \$8 Million

The City of Austin selected ECM to perform Project Management Services for the Montopolis Neighborhood Pool and Northwest District Pool renovations. The community of Austin approved a General Obligation Bond in 2018 that included an aquatic vision plan to renovate and revitalize neighborhood pools throughout the community.

Community engagement will begin in early 2022 to gather feedback on the amenities and assist the City in identifying the character of the pools, which will also feature the Art in Public Places (AIPP) program by commissioning a permanent art installation at both pools. Construction is expected to begin in the summer of 2023, with scheduled completion in the winter of 2024.

ECM's Project Management Services includes budget and schedule management, project management from initiation through project closeout, and assisting with the community engagement processes. ECM will also provide professional services evaluations, design management, construction management, coordination, document control, quality control, and additional services.
