Shape Corp. is a full-service supplier that provides design, engineering, testing and manufacturing of metal and plastic solutions for the automotive, medical, furniture and agricultural industries across North America, Europe and Asia. Shape is recognized globally as a pioneer in advanced custom roll forming and injection molding.

ECM provided a range of project management services to Shape as they expanded existing and built new manufacturing facilities in Queretaro, Mexico. These included creation of bid packages, GC bid evaluations and development of project scope, schedules and budgets.

ECM has completed an impressive variety of facilities all across Mexico for companies around the globe. We work in all regions of the country, across a broad array of hi-tech sectors.
