

Project Sheet

Public Safety Facility Hays County

CLIENT

Hays County

LOCATION

San Marcos, TX

ROLE

Program Management

COST/SIZE

\$41.3 Million

37,600 SF

The state-of-the-art Public Safety Building is located across from the County's pre-existing Government Center. The two-story facility houses the sheriff's administrative offices, Emergency Management Services, and 911 dispatch with new and high-tech safety operations to meet the growing County's safety needs.

The facility also has a criminal investigation division, records division, human resources department, and the office of compliance. All of which could no longer be housed in the original location. The facility includes extensive site work to mitigate flooding, utility and roadway extensions, and appropriate setbacks and site design to meet anti-terrorism standards.

ECM assisted the County with bond facilitation and provided program management services. Such as concept development, master budgeting, and master scheduling through occupancy. ECM also assisted in the procurement of the design team and construction services. ECM provided construction observations to assure a quality project was delivered.
