

RoadRunner Transit Operations and Maintenance Facility - City of Las Cruces

CLIENT

City of Las Cruces

LOCATION

Las Cruces, NM

ROLE

Project and Construction Management

COST/SIZE

\$27.5 Million
33,000 SF

The City of Las Cruces determined the need for a new Transit Operations Facility to house their well-known RoadRunner Bus operations and provide a space to expand the fleet, support electric buses, and have larger maintenance areas. The new facility will have a maintenance facility, an operations facility, a fueling building and potentially a washing station as well. The project is expected to be LEED-certified.

The first phase consists of the maintenance facility and charging stations with the first electric buses expected in April of 2022, the second phase will focus on the operations facility and fueling station, and the final phase will focus on a washing station.

As Owner Representative, ECM oversees all aspects of the project. ECM assists the owners through all aspects of the project from project and construction management services. ECM's services include reviewing pay applications, change orders, submittals, and assisting with RFIs, meeting minutes, and notice of non-compliance reports. ECM provides construction oversight and coordinates the work of the contractor, architect, owners, utility companies, and others as needed.
