

Park Pavilion and Shade Installations City of Pflugerville

CLIENT

City of Pflugerville

LOCATION

Pflugerville, TX

ROLE

Inspection Services

The City of Pflugerville selected ECM to provide construction management services for multiple park projects receiving picnic pavilion and playground shade structures at Genevas Park, 1849 Park, and Gilleland Park.

The pavilion at Genevas park consisted of a metal multi-ribbed covering with the potential inclusion of a solar panel. For the 1849 Park, the shade structures consisted of a high-density polyethylene fabric with ultraviolet additives with a Rachel knitting to protect against damage.

ECM's services included reviewing manufacturer's drawings, site visits, observing and reporting existing foundations for shaded structures, and team coordination and meetings to discuss reports and findings. ECM performed observations of the excavations, formwork, placement, and finishing, and the installation of the reinforcing steel, anchor bolts, and structural frames. ECM provided detailed photos and reports daily to the City identifying progress and quality of work.
